Acceder a Web of Knowledge

The screenshot shows the website of the Biblioteca Complutense Veterinaria. At the top left is the logo of the Universidad Complutense Madrid. The main header includes the text 'Biblioteca Complutense Veterinaria' and navigation links for 'Inicio/Buscar', 'Servicios', 'Bibliotecas', 'Colección Digital', and 'Ayuda'. A search bar contains the text 'web of knowledge' and a 'Buscar' button. Below the search bar are radio buttons for 'Catálogo', 'Catálogo en pruebas', and 'Libros digitalizados'. On the right side, there is a red-bordered box with the text: 'AVISOS CURSO GRATUITO de WEB OF KNOWLEDGE el 26 de noviembre a las 13h. ¿A que esperas para apuntarte?// PRÉSTAMO DE PORTÁTILES EN LA SALA. Más información en Préstamo.' Below this is a sidebar with links for 'Información', 'Pregúntanos', 'Guías temáticas', and 'Mi Cuenta'. The main content area features a section titled 'La Biblioteca Informa' with a sub-heading 'Jornada DOCUMAT: Digitalizaciones y documentación científica en Matemáticas'. A callout box points to the search bar with the text: 'Teclamos Web of Knowledge en la caja de búsqueda'. Below the callout is an image of a group of people in a classroom setting. To the right of the image is text about the upcoming 'Jornada DOCUMAT' on November 26th, mentioning the 'Aula Manuel de Guzmán' and the title 'Digitalizaciones y documentación científica en Matemáticas'. It also mentions that the 'programa completo' can be found in the library's blog. Below this are several news items: 'Exposición 'Híbridos'. Biblioteca de Bellas Artes.', 'La Biblioteca pone en funcionamiento su nueva web', and 'Nace la Confederación Internacional de Repositorios de Acceso Abierto (COAR)'. At the bottom right of the main content area is an 'RSS 2.0' icon. The bottom of the screenshot shows a Windows taskbar with the 'Internet' browser icon and a 100% zoom level.

The screenshot shows the ISI Web of Knowledge search interface. At the top, there is a navigation bar with links for 'Signed In', 'My EndNote Web', 'My ResearcherID', 'My Citation Alerts', 'My Journal List', 'My Saved Searches', 'Log Out', and 'Help'. Below this is the 'ISI Web of Knowledge' logo and the tagline 'Take the next step'. The main navigation tabs include 'All Databases', 'Select a Database', 'Web of Science', and 'Additional Resources'. The 'Web of Science' tab is selected, and a callout box points to it with the text: '1. Pinchamos la pestaña Web of Science'. Below the navigation, there are search options: 'Search', 'Cited Reference Search', 'Structure Search', 'Advanced Search', 'Search History', and 'Marked List (0)'. The 'Web of Science' section is highlighted, and a callout box points to it with the text: '2. Seleccionamos sólo Science Citation Index'. The search form contains two input fields. The first field contains 'equine dentistry' and has a callout box pointing to it with the text: '3. Introducimos nuestros términos de búsqueda'. Below the first field is an 'AND' dropdown menu. The second field is empty and also has an 'AND' dropdown menu. To the right of the search fields is a dropdown menu for selecting the search field. The 'Topic' option is selected, and a callout box points to it with the text: '4. Seleccionamos un campo de búsqueda, i.e., Topic'. Below the search fields are 'Search' and 'Clear' buttons. A callout box points to the 'Search' button with the text: '5. Pinchamos Search'. Below the search buttons, there are 'Current Limits' and 'Timespan' options. The 'Timespan' section has a radio button selected for 'All Years' and a dropdown menu for 'From 1900-1914 to 2009'. Below this is the 'Citation Databases' section, which has a checked checkbox for 'Science Citation Index Expanded (SCI-EXPANDED)--1900-present'. A callout box points to this checkbox with the text: '2. Seleccionamos sólo Science Citation Index'. Below the 'Citation Databases' section is the 'Chemical Databases' section, which has an unchecked checkbox for 'Index Chemicus (IC)--1993-present'. On the right side of the page, there is a 'Welcome, Carmen Muñoz' message and a 'Looking for ISI Proceedings?' section. Below this is a 'Discover Web of Science' section with a description of the database and a list of links: 'Want to know more?', 'Training in multiple languages', 'My Web of Knowledge', 'My EndNote Web', 'My Citation Alerts', and 'My Saved Searches'. The bottom of the page shows a Windows taskbar with the Internet Explorer icon and a 100% zoom level.

Búsqueda en Web of Science

The screenshot displays the ISI Web of Knowledge interface. Author(s): Dixon PM, Dacre I

Source: VETERINARY JOURNAL Volume: 169 Issue: 2 Pages: 165-187 Published: MAR 2005

Times Cited: 23 References: 74 Citation Map

Abstract: Equine dentistry is a very important but until recently rather neglected area of equine practice, with many horses suffering from undiagnosed, painful dental disorders. A thorough clinical examination using a full mouth speculum is a prerequisite to performing any equine dental procedure. Common incisor disorders include: prolonged retention of deciduous incisors, supernumerary incisors and overjet - the latter usually accompanied by cheek teeth (CT) overgrowths. Overjet can be surgically corrected, but perhaps should not be in breeding animals. In younger horses, traumatically fractured incisors with pulpar exposure may survive by laying down tertiary dentine. Loss or maleruption of incisors can cause uneven occlusal wear that can affect mastication. Idiopathic fractures and apical infection of incisors are rare. The main disorder of canine teeth is the development of calculus of the lower canines, and occasionally, developmental displacements and traumatic fractures. The main indications for extraction of "wolf teeth" (Triadan 05s) are the presence of displaced or enlarged wolf teeth, or their presence in the mandible.

Developmental abnormalities of the CT include; rostral positioning of the upper CT rows in relation to the lower CT rows - with resultant development of focal overgrowths on the upper 06s and the lower 1 Is. Displaced CT develop overgrowths on unopposed aspects of the teeth and also develop periodontal disease in the inevitable abnormal spaces (diastemata) that are present between displaced and normal teeth. Diastemata of the CT due to excessive developmental spacing between the CT or to inadequate compression of the CT rows is a common but under diagnosed problem in many horses and causes very painful periodontal disease and quidding. Supernumerary CT mainly occur at the caudal aspect of the CT rows and periodontal disease commonly occurs around these teeth. Eruption disorders of CT include prolonged retention of remnants of deciduous CT ("caps") and vertical impaction of erupting CT that may lead to large eruption cysts and possibly then to apical infections. Disorders of wear, especially e...

Author(s): Dixon PM, Dacre I

Source: VETERINARY JOURNAL Volume: 169 Issue: 2 Pages: 165-187 Published: MAR 2005

Times Cited: 23 References: 74 Citation Map

Abstract: Equine dentistry is a very important but until recently rather neglected area of equine practice, with many horses suffering from undiagnosed, painful dental disorders. A thorough clinical examination using a full mouth speculum is a prerequisite to performing any equine dental procedure. Common incisor disorders include: prolonged retention of deciduous incisors, supernumerary incisors and overjet - the latter usually accompanied by cheek teeth (CT) overgrowths. Overjet can be surgically corrected, but perhaps should not be in breeding animals. In younger horses, traumatically fractured incisors with pulpar exposure may survive by laying down tertiary dentine. Loss or maleruption of incisors can cause uneven occlusal wear that can affect mastication. Idiopathic fractures and apical infection of incisors are rare. The main disorder of canine teeth is the development of calculus of the lower canines, and occasionally, developmental displacements and traumatic fractures. The main indications for extraction of "wolf teeth" (Triadan 05s) are the presence of displaced or enlarged wolf teeth, or their presence in the mandible.

Developmental abnormalities of the CT include: rostral positioning of the upper CT rows in relation to the lower CT rows - with resultant development of focal overgrowths on the upper 06s and the lower 11s. Displaced CT develop overgrowths on unopposed aspects of the teeth and also develop periodontal disease in the inevitable abnormal spaces (diastemata) that are present between displaced and normal teeth. Diastemata of the CT due to excessive developmental spacing between the CT or to inadequate compression of the CT rows is a common but under diagnosed problem in many horses and causes very painful periodontal disease and quidding. Supernumerary CT mainly occur at the caudal aspect of the CT rows and periodontal disease commonly occurs around these teeth. Eruption disorders of CT include prolonged retention of remnants of deciduous CT ("caps") and vertical impaction of erupting CT that may lead to large eruption cysts and possibly then to apical infections. Disorders of wear, especially enamel overgrowths ("enamel points"), are the main equine dental disorder and are believed to be largely due to the dietary alterations associated with domestication. If untreated, such disorders will eventually lead to more severe CT disorders such as shearmouth and also to widespread periodontal disease. More focal dental overgrowths will develop opposite any CT not in full opposition to their counterpart, e.g., following maleruption of or loss of a CT.

Because of the great length of reserve crown in young (hypsodont) CT, apical infections usually cause infection of the supporting bones and depending on the CT involved, cause facial swellings and fistulae and possibly sinusitis. Diagnosis of apical infection requires radiography, and possibly scintigraphy and other advanced imaging techniques in some early cases. When possible, oral extraction of affected CT is advocated, because it reduces the costs and risks of general anaesthesia and has much less post-extraction sequelae than CT repulsion or buccotomy. Impact Factor Trend Graph: VETERINARY JOURNAL

Click on the "Return to Journal" button to view the full journal information.

*Impact Factor -- see below for calculations

The journal impact factor is a measure of the frequency with which the "average article" in a journal has been cited in a particular year. The impact factor will help you evaluate a journal's relative importance, especially when you compare it to others in the same field. For more bibliometric data and information on this and other journal titles click on the "Return to Journal" button.

NOTE: Title changes and coverage changes may result in no impact factor for one or more years in the above graph.

2008 Impact Factor

Cites in 2008 to articles published in: 2007 = 327 Number of articles published in: 2007 = 183
2006 = 257 2006 = 141
Sum: 584 Sum: 324
Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{584}{324} = 1.802$

2007 Impact Factor

Cites in 2007 to articles published in: 2006 = 189 Number of articles published in: 2006 = 141

The screenshot shows the ISI Web of Knowledge interface. At the top, there is a navigation bar with links: Signed In | My Endnote Web | My Citation Alerts | My Journal List | My Saved Searches | Log Out | Help. The main header reads "ISI Web of KnowledgeSM Take the next step".

The main content area is titled "Processing Records" and contains the following text:
Please wait while your request is processed.
(Note: Depending on the number of records, this may take a few moments.)
Product: Web of Science
Selected action: Save to File
Processing 11 records:
10...11...Done.

Below this text are two buttons: "Save" and "Return". The "Save" button is highlighted, and a tooltip-like text next to it says: "If the 'Save As' dialog box appears, click 'Save' to save the records." The "Return" button has a tooltip: "Click 'Back' to return to the search results page."

A modal dialog box titled "Descarga de archivos" is overlaid on the page. It asks: "¿Desea abrir o guardar este archivo?". The file details are:
Nombre: savedreos.txt
Tipo: Documento de texto
De: sauwok.fecyt.es

At the bottom of the dialog are three buttons: "Abrir", "Guardar", and "Cancelar". The "Guardar" button is highlighted. Below the buttons is a warning message: "Aunque los archivos procedentes de Internet pueden ser útiles, algunos archivos pueden llegar a dañar el equipo. Si no confía en el origen, no abra ni guarde este archivo. ¿Cuál es el riesgo?".

A green box with a white background and a green border is positioned at the bottom right of the dialog, containing the text: "Guardamos el archivo con las citas en nuestro ordenador". A green line points from this box to the "Guardar" button in the dialog.

The bottom of the screenshot shows a Windows taskbar with the system tray containing "Listo", "Internet", and "100%" zoom level.

Utilidades: enviar citas por email

The screenshot shows a search results page from Thomson Reuters. It displays three search results, each with a checkbox for selection. Below the results is a control panel for 'Output Records' with three steps: Step 1 (selection), Step 2 (format), and Step 3 (export options). Three green callout boxes with arrows point to specific elements: Box 1 points to the 'Records 1 to 11' selection range; Box 2 points to the 'Full Record' format option; Box 3 points to the 'E-mail' button in the export options.

Analytical Tools:

Journal Citation Reports®

Journal performance metrics offer a systematic, objective means to critically evaluate the world's leading journals

- Delivers quantifiable statistical information based on citation data
- Helps determine a publication's impact and influence in the global research community
- Includes journal and category data

Essential Science IndicatorsSM

In-depth analytical tool offering data for ranking scientists, institutions, countries, and journals.

- Explore science performance statistics and science trends data, based on journal article publication counts and citation data
- Determine research output and impact in specific fields of research
- Evaluate potential employees, collaborators and peers

Web Sites:

ISI HighlyCited.comSM

This free, expert gateway uses citation data to deliver comprehensive information about the most significant scientists and scholars publishing today.

BiologyBrowser

A free database of resources and links for the life sciences information community.

Index to Organism Names

The world's largest online database of scientific organism names.

ResearcherID.com

Science Watch®

Weekly tracking of hot or emerging papers and research fronts in this free Web resource for science metrics and analysis. Includes interviews, first-person essays, podcasts, and profiles from scientists, journals, institutions, and nations, selected using *Essential Science IndicatorsSM* from Thomson Reuters.

Thomson Scientific

Find out more about information-based solutions available to the academic, business, and R&D communities.

Select a Database

ISI Web of Knowledge products are high-quality research databases that you can access from the Select a Database tab. Keep in mind that this page displays only those product databases to which your institution has a subscription.

Web of Science[®]

Web of Science consists of seven databases containing information gathered from thousands of scholarly journals, books, book series, reports, conferences, and more.

The first three citation databases contain the references cited by the authors of the articles. You can use these references to do cited reference searching. This type of search allows you to find articles that cite a previously published work.

- [Science Citation Index Expanded \(SCI-Expanded\)](#)
- [Social Sciences Citation Index \(SSCI\)](#)
- [Arts & Humanities Citation Index \(A&HCI\)](#)

The two conference proceedings citation indexes include the published literature of the most significant conferences, symposia, seminars, colloquia, workshops, and conventions in a wide range of disciplines. Use these databases to track emerging ideas and new research in specific fields.

- [Conference Proceedings Citation Index - Science \(CPCI-S\)](#)
- [Conference Proceedings Citation Index - Social Sciences & Humanities \(CPCI-SSH\)](#)

The two chemistry databases allow you to create structure drawings to find chemical compounds and reactions. You can also search these databases for compound and reaction data.

- [Index Chemicus \(IC\)](#)
- [Current Chemical Reactions \(CCR-Expanded\)](#)

Science Citation Index Expanded[™] (SCI[™] Expanded)

Science Citation Index Expanded is a multidisciplinary index to the journal literature of the sciences. It fully indexes over 6,650 major journals across 150 scientific disciplines and includes all cited references captured from indexed articles.

Some of the disciplines covered include:

Availability of Records in All Databases Search

Records become available in the All Databases Search function generally within 24 hours after we load them in a product database. As a result, you may retrieve fewer records (and a smaller Times Cited count) in an All Databases search than in a product database search during this delayed period. If you encounter this discrepancy, we suggest that you return later and run a new All Databases search.
